Administrative Officer Date

Tree Removal Permit
Instructions to Applicant

No site clearing or tree removal is to begin until the permit has been approved.

Submit one copy of the application and three copies of the tree removal plan drawing.

The drawing should show the location of trees that will be removed and the location of any trees that will remain within 20 feet of disturbance. Indicate how vegetation to remain will be protected from damage during work.

You must provide the following at the site:

---- Stakes showing building corners, outlines of driveways, roads, etc. in areas where trees are to be removed.

---- Ribbons, flagging or paint marks on individual trees, or the outline of the area of trees proposed to be removed. Do not mark trees that are to remain.

---- The protective devices for vegetation that will remain, as noted above. Fencing should be set at the dripline of trees that are to remain.

Note: any replacement shade trees that may be required to be planted must be minimum 2-2.5" caliper and 12' in height nursery-grown trees.

Applicant's Certification: I agree to carry out tree removal according to the plan approved in this permit. I understand that removing trees that have not been approved for removal may result in penalties as specified in the South Plainfield Borough Code Chapter "Trees" section 185-10 and 185-11.
